Area (ha) – 6092.44
Percentage to Total Area – 54.48

2

Gently Sloping to Undulating

Percent Slope – 3-8
Area (ha) – 2342.11
Percentage to Total Area – 20.98

3

Undulating to Rolling

Percent Slope – 8-11
Area (ha) – 1530.10
Percentage to Total Area – 13.71

4

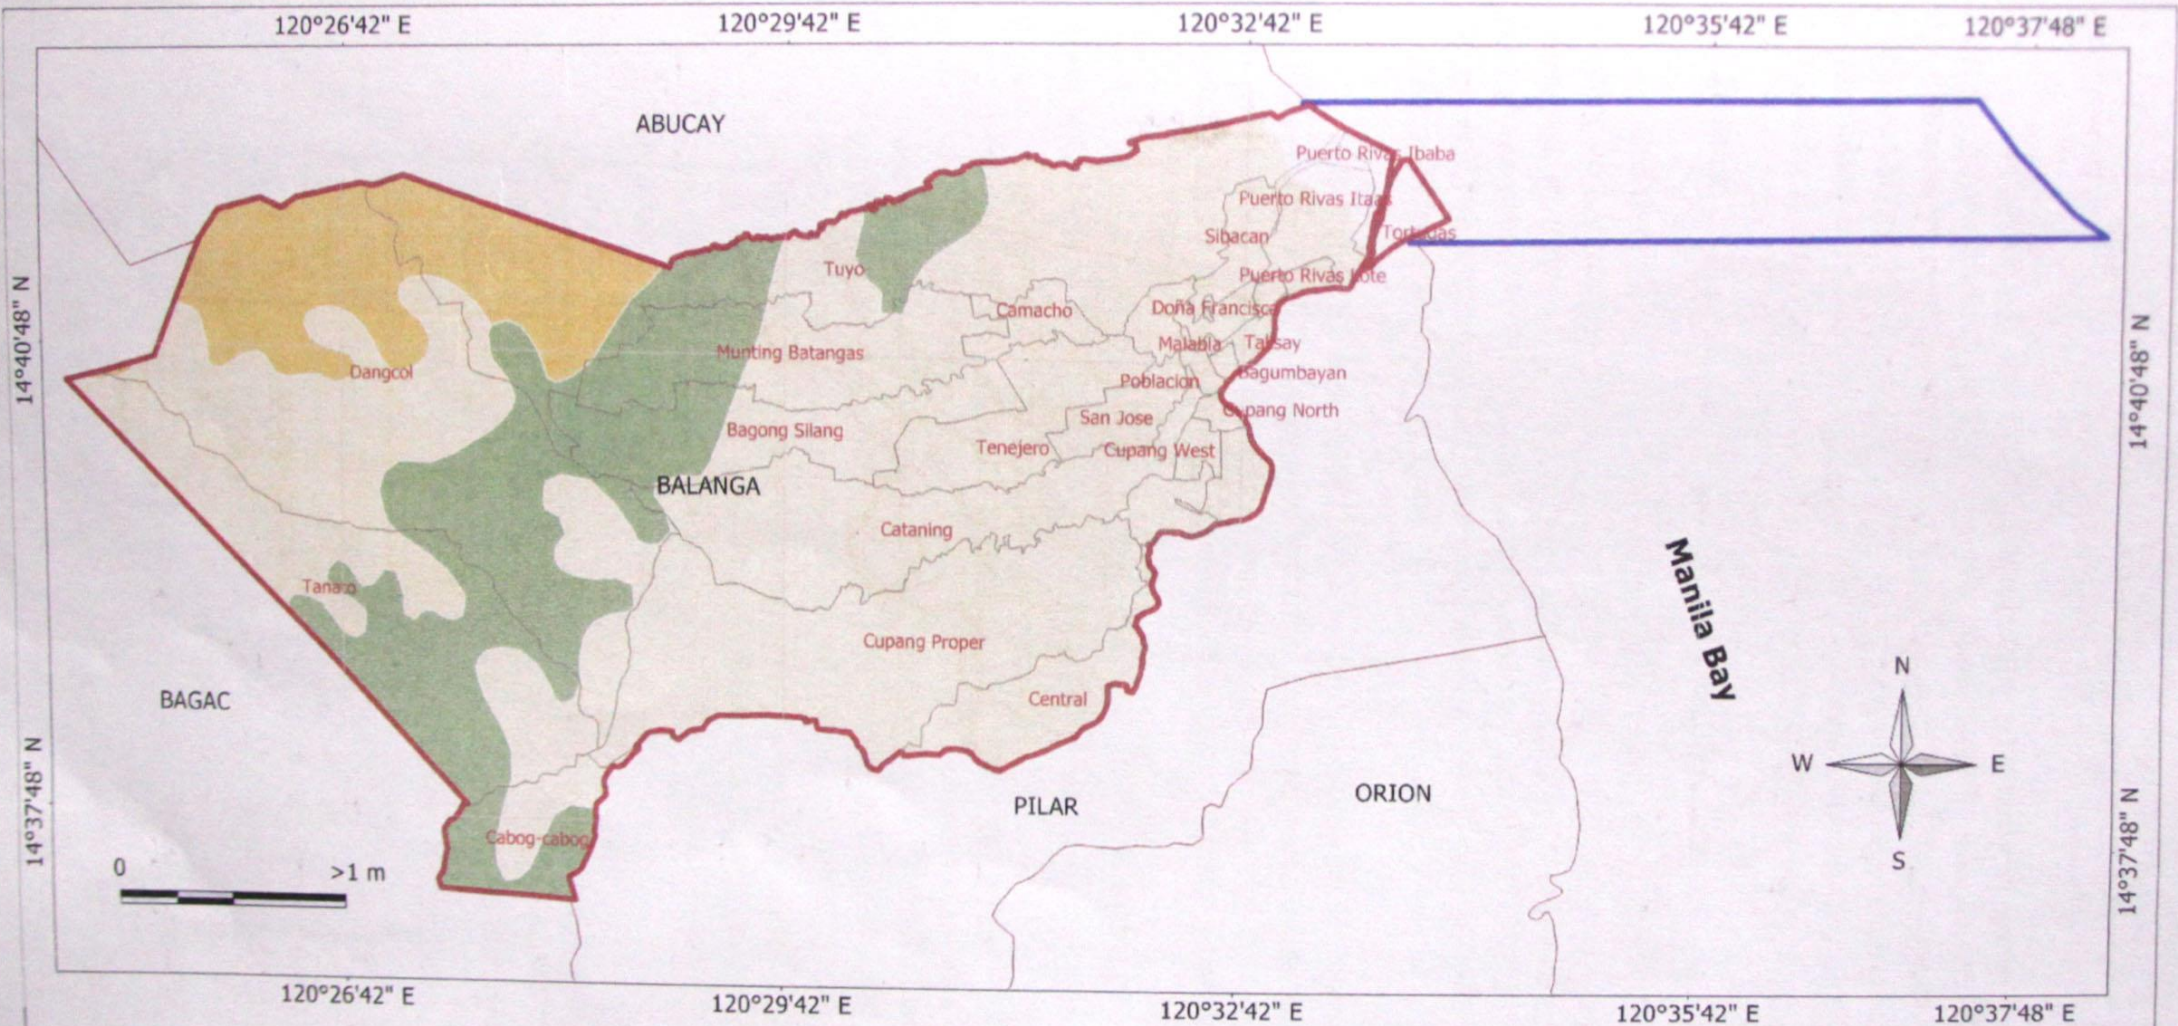

Rolling to Moderately Steep

Percent Slope – 18-30
Area (ha) – 1198.36
Percentage to Total Area – 10.73

Table 2. Slope classification of areas in Balanga City.

Description	Percent Slope	Area (ha)	Percentage to the total area
Level to nearly level - Areas that belong to these category are the most suitable for irrigation because of their flat terrain. Depending on soil physical condition, 3% is about the maximum slope of the land to be used for lowland rice production.	0-3	6092.44	54.58
Gently sloping to undulating Areas are suitable for irrigation but require slight terrain modification in terms of contouring or terracing. Depending on soil and climatic condition in the area, 8 percent is about the maximum slope for upland crop production that will require more complex and expensive soil conservation practices	3-8	2342.11	20.98
Undulating to rolling Due to terrain restrictions, irrigation of lowland rice will not be feasible. Intensive soil conservation measures are necessary to keep the soil in place when cultivated.	8-18	1530.10	13.71
Rolling to moderately steep On these lands cultivated crops cannot be produced continuously over and extended period of time. Tree crops, however, can be grown.	18-30	1198.36	10.73
Total		11,163	100.00

City Ordinance No. 118-2003

“An Ordinance Enforcing Strict Compliance to Provision of PD 856 Otherwise Known as “The Sanitation Code of the Philippines” by the Business Establishments in the City of Balanga”

Wetland Before and Now

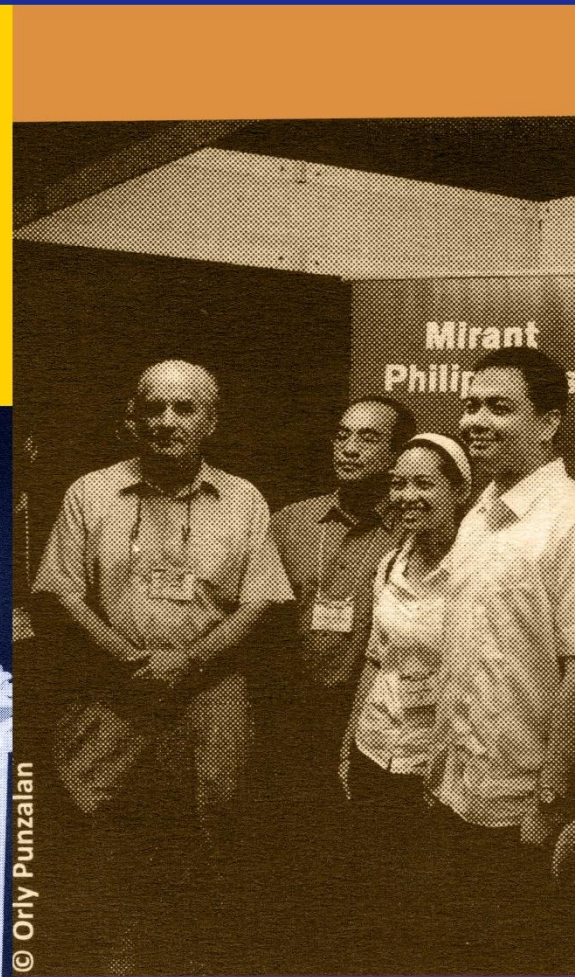

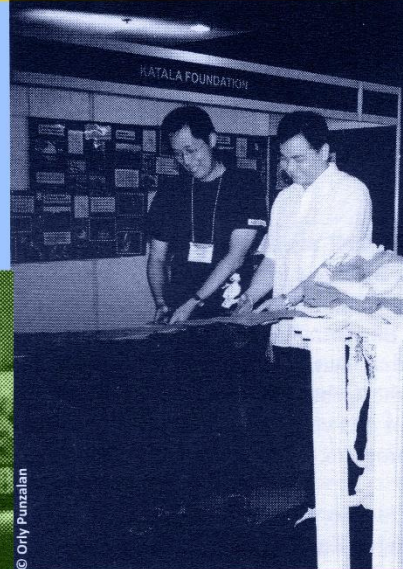

BALANGA WETLAND AND NATURE PARK:

Highlights of a City's Love Affair with Nature

DISCOVERY OF BALANGA'S TREASURES: In 2005, Governor Enrique "Tet" Garcia invited members of the Wild Bird Club of the Philippines (WBCP) to birdwatch in Bataan. WBCP was delighted by the diversity and numbers of migratory and resident birds in Balanga City.

SOLIDARITY WITH BIRDWATCHERS: Congressman Albert Raymond "Abet" S. Garcia of the 2nd District of Bataan supported the WBCP as the Guest of Honor at the First Philippine Bird Festival held in Quezon City. A friendship is born.

ENTHUSIASM FOR BIRDS AND NATURE:

In October 2005, the Provincial Government declared the whole province as a bird sanctuary. The declaration was highlighted by a ceremonial release of two (2) rehabilitated Brahminy Kites at the historical monument of Mt. Samat in Pilar, Bataan.

DEEPER INVOLVEMENT, NEW HEIGHTS: The City of Balanga was declared as the venue of the 2009 Philippine Bird Festival during the Closing Ceremony of the 2008 Philippine Bird Festival hosted in Palawan. The 5th Philippine Bird Festival in Balanga in 2009, aptly themed "Ibong Dayo, Kaibigan Tayo" (Migratory Birds, Our Friends) was a huge success, with about 15,000 locals participating in the events!

WIDESPREAD CONTAMINATION FOR THE LOVE OF BIRDS: Constant visits, information dissemination drive and series of workshops conducted by conservation groups and environmental protection advocates led by the Wild Bird Club of the Philippines (WBCP) and the Department of Environment & Natural Resources (DENR) raised Balangueños' awareness and appreciation for the birds in their midst.

SHARING THE TREASURES: Balanga City was one of the 13 birdwatching sites identified by the Department of Tourism's (DOT) Adventure Philippines Campaign in 2008. Then DOT Secretary Robert "Ace" Durano had his first bird-watching experience at the Sibacan Fishponds!

COMMITMENT, PRIDE AND HONOR: Balanga has consistently shown its hospitality for migratory birds as a topnotcher at the annual Asian Waterbird Census. The large numbers of wintering birds are attributed to the excellent conditions of mangroves, wetlands and other wild areas of this progressive city on the shores of Manila Bay. Balanga proves that development is possible without sacrificing nature.

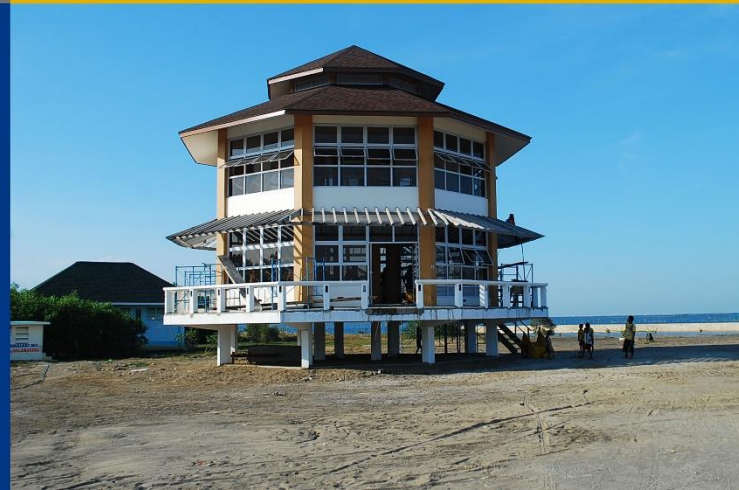

LEADERSHIP AND THE LONG VIEW: City Mayor Jose Enrique "Joet" S. Garcia III and Mrs. Isabel Garcia joined other Philippine delegates from birdwatching sites in the country to represent the city at the World Travel Mart & Book-Launching of Book II of "Bird-Watching in the Philippines" in London, November 2008. But it was during the preparations for the 5TH Philippine Bird Festival in Balanga that the idea of setting up a Balanga City Wetland and Nature Park at Barangay Tortugas to further nurture and support Balanga's natural delights.

SUSTAINING LOVE FOR NATURE: The Wetland and Nature Park was envisioned to be the country's first wetland and outdoor museum and is designed as collaboration with nature, using available planting materials, and minimal structures. Construction of the information Center started January 2009.

The cause of protecting birds and the entire eco-system is now engraved in the hearts of all Balangueños symbolized by the new Balanga City Wetland & Nature Park!
