

# National Report Template

## Background

The purpose of the National Report is to provide information on each Signatory State's implementation of the Dugong MOU. The information in National Reports will be collated to give an overview of regional and international implementation of the Dugong MOU and to highlight opportunities for collaboration.

When completing the National Report template, you may wish to refer to the **Dugong MOU Conservation and Management Plan (CMP)** and Annex 1 (for examples of specific actions that could be implemented under the CMP) at

[www.cms.int/sites/default/files/document/Dugong\\_CMP\\_Eng\\_0.pdf](http://www.cms.int/sites/default/files/document/Dugong_CMP_Eng_0.pdf) .

## Instructions for completing the National Report

- Please complete all questions. Where a written response is required, please provide an answer.
- Check-boxes can be selected by clicking on it, an 'x' will appear in the box. You can de-select a box by clicking on it again.
- To enter text, highlight on 'click here to insert text' and start typing.
- You should select all activities (check-boxes) that are relevant to each question.
- The questions in the National Report refer to any activities you have undertaken since your country became a Signatory to the Dugong MOU, until December 2016. For example, if a country became a Signatory to the MOU in January 2010, this report would refer to any activities from January 2010 to December 2016 (particularly highlighting recent activities).
- Detailed responses are encouraged, especially with regard to future plans. Wherever possible and/or relevant, please indicate the source of information used to answer a particular question. For example, if you are answering using information from a published annual report, please include the name of the report and link if it is available online. Remember that you are sharing information with other countries about your progress, so it may be of benefit to them.
- When you have completed your report, please email it, along with any other relevant information to the Dugong MOU Secretariat at [CmsOffice.ae@cms.int](mailto:CmsOffice.ae@cms.int).
- The deadline for submission of National Reports is **31 December 2016**. Reports must be received by this date to allow time for collation of results prior to presentation at the Third Meeting of Signatories on 13-14 March 2017.

## Section 1: General information

### 1. What country are you completing the National Report on behalf of?

Kenya

Memorandum of Understanding on the Conservation and Management of Dugongs and their Habitats  
throughout their Range

Convention on Migratory Species Office - Abu Dhabi • United Nations Environment Programme

c/o Environment Agency - Abu Dhabi • PO Box 45553 • Abu Dhabi • United Arab Emirates

T +971 2 6934 437 • F +971 2 4997 252 • [cmsoffice.ae@cms.int](mailto:cmsoffice.ae@cms.int) • [www.cms.int/dugong](http://www.cms.int/dugong)

**2. What agency or institution has been primarily responsible for answering the questions in this report?**

Kenya Wildlife Service

**3. Please list any other agencies, institutions or non-government organisations that have provided input:**

Kenya Marine and Fisheries Research Institute

State Department of Fisheries

WWF

**4. On what date did the Dugong MOU take effect in your country? i.e. what is the start date of activities reported on in this National Report?**

2008

**5. On what date are you submitting this report?**

27th January 2017

PLEASE PROCEED TO SECTION 2

## Section 2: Dugong status

Questions in Section 2 address the following objectives and actions of the Dugong MOU Conservation and Management Plan:

- Objective 1: Reduce direct and indirect causes of dugong mortality
  - 1.1 Threats facing dugong populations
  - 1.2 Dugong mortality in fishing activities
  - 1.3 Dugong mortality due to human activities
  - 1.4 Illegal Take of Dugongs
  - 1.5 Sustainable Use of Dugongs
- Objective 8. Improve legal protection of dugongs and their habitats
  - 8.2 Legal protection

### 6. Which of the following has your country done to identify, assess and evaluate the threats to dugong populations?

Established baseline data collection and monitoring programmes to gather information on the nature and magnitude of threats.

#### **This has been done and there is monitoring of habitats as well**

Regularly updated existing data on threats to dugong populations and their habitats. **Ongoing**

Determined those populations affected by traditional subsistence and customary use, incidental capture in fisheries, and other sources of mortality.

#### **There are few sighting restricted to Kenya-Tanzania border and Kenya-Somalia border. An aerial census in December only sighted a single dugong near Fundi Island**

Conducted socio-economic studies among communities that interact with dugongs and their habitats. **This was done and is now being repeated**

Other, please describe: Click here to enter text.

### 7. Has your country undertaken measures to address these threats to dugongs?

Yes (please continue to question 8.) **Yes**

No (please continue to question 9.)

### 8. What kind of measures has your country undertaken to address these threats?

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

#### **Kenya has formulated legislation that lists the dugong as a protected species and together with its habitats, are completely protected from any form of exploitation**

### 9. Which of the following has your country done to reduce the incidental capture and mortality of dugongs as a result of fishing activities (i.e. bycatch of dugongs)?

Developed and used gear, devices and techniques to minimise incidental capture of dugongs in artisanal and commercial fisheries, such as the use of alternative gears and spatial closures.

#### **Spatial closures have been done in Kenya as marine protected areas. Communities have also come up with locally managed area for both fisheries regulation, ecotourism and environmental conservation**

Limited or controlled the use of gears known to be harmful to dugongs throughout the range of dugong. **This is being implemented by the fisheries department together with Kenya Wildlife Service and other partners such as WWF**

Developed procedures and extension programmes to promote implementation of these measures.

**The fisheries department has established Beach Management Units, KWS has established County Wildlife Compensation and Conservation Committees that operate through participatory and integrated processes to promote and implement conservation measures.**

Exchanged information and, upon request, provided technical assistance to Signatory and cooperating States to promote these activities. **Currently ongoing with Tanzania, Mozambique and South Africa**

Liaised and coordinated with fishing industries, fisheries management organisations and community groups to develop and implement activities that reduce the incidental capture and mortality of dugongs.

**There are proposals to establish community conservation areas to protect endangered species and a proposal with Tanzania to establish a Transboundary conservation area between Kenya and Tanzania - a known dugong hotspot**

Developed and implemented net retention and recycling schemes to minimise the disposal of fishing gear at sea and on beaches. **Legislation is in place**

Provided and ensured the use of onshore facilities for the disposal of ship-borne waste.

**Dumping in Kenyan waters is illegal and waste reception facilities are installed at the port**

Other, please describe: Click here to enter text.

**10. Which of the following has your country done to reduce the incidental mortality of dugongs from other anthropogenic (human) activities?**

Assessed the level, location and impact of anthropogenic impacts on dugongs at ecologically relevant scales. **A study is currently ongoing**

**Reduced, as much as possible, all other human impacts on dugongs and their habitats in areas that sustain subsistence and/or customary use of dugongs.**

Established appropriate management programmes to ensure that anthropogenic impacts are addressed, taking account of the temporal and spatial variability of dugong reproductive rates and other impacts on the species in a precautionary manner.

Other, please describe: Click here to enter text.

**11. Has your country undertaken actions to reduce and/or prevent the illegal take of dugongs?**

Yes (please continue to question 12.)

No (please continue to question 13.)

**12. What has your country done to prevent the illegal take of dugongs?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

**13. Is customary and/or subsistence use of dugongs allowed in your country?**

Yes (please continue to question 14.)

No (please continue to question 15.)

**14. What has your country done to ensure that customary and/or subsistence use of dugongs is sustainable?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

**15. Are dugongs and/or their habitats granted legal protection in your country?**

Yes (please continue to question 16.)

No (please continue to question 17.)

**16. What kind of legal protection are dugongs and/or their habitats granted and what measures has your country developed to review and, where necessary, strengthen legal protection of dugongs and their habitats?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

PLEASE PROCEED TO SECTION 3

## Section 3: Dugong habitats

Questions in Section 3 address the following objectives and actions of the Dugong MOU Conservation and Management Plan:

- *Objective 3: Protect, conserve and manage habitats for dugong*
  - *3.2 Protect dugong habitats*
  - *3.3 Actions to address habitat loss*
  - *3.4 Degraded dugong habitats*

### **17. Which of the following has your country done to protect and conserve dugong habitats (such as seagrasses)?**

Designated and managed protected/conservation areas, sanctuaries or temporary exclusion zones in areas of critical habitat, or took other measures (e.g. modification of fishing gear, banning destructive fishing practices, restrictions on vessel traffic) to remove threats to such areas and involving the local community as much as possible.

Developed incentives for adequate protection of areas of critical habitat outside protected areas.

Considered protecting dugong habitats as part of ecosystem based management (e.g., networks of marine protected areas).

Assessed the environmental impact of marine and coastal development and other human activities on dugong populations and their habitats.

Monitored and promoted the protection of water quality from land-based and maritime pollution, including marine debris, which may adversely affect dugongs and their habitats.

Strengthened the application of existing bans on the use of poisonous chemicals and explosives in the exploitation of marine resources.

Other, please describe: [Click here to enter text.](#)

### **18. Which of the following has your country done to address current degradation, and to reduce the risk of future degradation of dugong habitats (such as seagrasses)?**

Identified and enhanced recovery of degraded seagrass habitats used by dugongs.

Identified and enhanced recovery of degraded mangrove and coral reef habitats used by dugongs.

Undertook measures to restore degraded habitats.

Other, please describe: [Click here to enter text.](#)

PLEASE PROCEED TO SECTION 4

## Section 4: Research and Monitoring

Questions in Section 4 address the following objectives and actions of the Dugong MOU Conservation and Management Plan:

- **Objective 2. Improve understanding through research and monitoring**
  - 2.1 Dugong Populations and Habitats
  - 2.2 Dugong Research
  - 2.3 Data Collection and Analysis
- **Objective 3: Protect, conserve and manage habitats for dugong**
  - 3.1 Dugong Habitat Mapping
- **Objective 4: Improve understanding of dugong habitats through research and monitoring**
  - 4.1 Research of Habitats

### **19. What has your country done to determine the distribution and abundance of dugong populations to provide a base for future conservation efforts and actions?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

### **20. Which of the following has your country done to conduct research and monitoring into dugongs?**

Initiated and/or continued long-term monitoring of priority dugong populations at appropriate spatial scales.

Identified migratory routes through the use of techniques such as genetic studies and/or satellite tracking where appropriate.

Carried out studies on dugong population dynamics and survival rates.

Promoted the use of traditional ecological knowledge in research and management studies, where possible.

Involved local communities in research and monitoring programmes, with training as required.

Periodically reviewed and evaluated research and monitoring activities.

Identified and included priority research and monitoring needs in regional and sub-regional action plans.

Conducted collaborative studies and monitoring of genetic identity, conservation status, migrations, and other biological and ecological aspects of dugongs.

Other, please describe: Click here to enter text.

### **21. Does your country collect data on dugongs?**

Yes (please continue to question 22.)

No (please continue to question 23.)

### **22. What kind of data does your country collect on dugongs and how is it analysed?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

### **23. Which of the following has your country done to conduct research and monitoring into important dugong habitats (such as seagrasses)?**

Conducted baseline studies or gathered secondary information on dugong habitats using cost effective techniques where possible, including community-based monitoring.

Initiated and/or continued long-term monitoring of priority dugong habitats.

## Dugong MoU National Report Template

Promoted the use of traditional ecological knowledge in research and management studies, where possible.

Involved local communities in research and monitoring programmes with training as required.

Periodically reviewed and evaluated research and monitoring activities.

Identified and included priority research and monitoring needs in regional and sub-regional action plans.

Other, please describe: [Click here to enter text.](#)

### **24. Has your country undertaken any identification and mapping of important dugong habitats (such as seagrasses)?**

*Yes (please continue to question 25.)*

*No (please continue to question 26.)*

### **25. What kind of identification and mapping of dugong habitats has your country undertaken?**

[Click here to enter text.](#) See CMP Annex 1 for examples of measures/actions.

PLEASE PROCEED TO SECTION 5

## Section 5: Dugong conservation

Questions in Section 5 address the following objectives and actions of the Dugong MOU Conservation and Management Plan:

- *Objective 5: Raise awareness of dugong conservation*
  - *5.1 Information programmes*
  - *5.2 Encourage local community participation*

### **26. Which of the following has your country done to establish education, awareness and information programmes?**

Collected, developed, coordinated and disseminated education materials (e.g. dedicated regional website).

Identified key persons/champions to help disseminate messages about the need to conserve dugongs and their habitats.

Established community learning/information centres.

Developed and implemented mass media information programmes.

Developed and conducted focused education and awareness programmes for target groups (e.g. policy makers, teachers, schools, fishing communities, subsistence and customary users, media).

Encouraged the incorporation of dugong biology and conservation issues into school curricula.

Organised special events related to dugong conservation and biology (e.g. Dugong Day, Year of the Dugong, symposia, and community education workshops).

Promoted public participation in conservation activities.

Involved stakeholders, including key policymakers, subsistence and customary users, and local communities in particular, in planning and implementation of conservation and management measures.

Encouraged the participation of government institutions, intergovernmental organisations, the private sector and the general community (e.g. students, volunteers, fishing communities, local communities) in research, conservation and management efforts.

Implemented, where appropriate, incentive schemes to encourage public participation (e.g. T-shirts, public acknowledgement and certificates).

### **27. What specifically has your country done to encourage local communities to actively participate in conservation efforts?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

PLEASE PROCEED TO SECTION 6

## Section 6: Cooperation

Questions in Section 6 address the following objectives and actions of the Dugong MOU Conservation and Management Plan:

- Objective 6: Enhance national, regional and international cooperation*
  - 6.1 Combat illegal trade*
  - 6.2 Information exchange*
  - 6.3 Improve coordination*
  - 6.4 Database*
- Objective 8: Improve legal protection of dugongs and their habitats*
  - 8.1 Incorporation into national legislation*
- Objective 9: Enhance national, regional and international cooperation on capacity building*
  - 9.1 Promote capacity building*

### **28. Which of the following has your country done in order to collaborate with and assist Range States to combat illegal international trade of dugongs and dugong related products?**

Encouraged Signatory States, that have not already done so, to become Parties to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).

Reviewed at a national level, compliance with obligations under CITES relating to illegal international trade in dugong parts or products.

Facilitated better compliance with CITES through training of relevant authorities in cooperation with other Signatory States, the CITES Secretariat and other relevant organisations.

Identified routes of international illegal trade through monitoring, and sought cooperation to take action to prevent, deter and, where possible, eliminate it.

Other, please describe: Click here to enter text.

### **29. What has your country done to work collaboratively with dugong Range States to combat illegal domestic and/or regional trade of dugongs and dugong related products?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

### **30. Which of the following has your country undertaken to cooperate in enforcement activities relating to the illegal trade of dugongs and dugong related products?**

Exchanged and discussed information on compliance and illegal trade issues at regular intervals, such as through annual reporting to the MOU Secretariat and at meetings of the Signatory States.

Identified, prevented, deterred and, where possible, eliminated domestic illegal trade through monitoring, implementation of legislation, identification of gaps in enforcement capabilities, and training of enforcement officers.

Other, please describe: Click here to enter text.

### **31. Which of the following has your country done to develop and implement mechanisms for effective exchange of information?**

Identified and strengthened existing mechanisms for cooperation at the regional and sub-regional level.

Developed a website and/or newsletter to facilitate networking and exchange of information.

## Dugong MoU National Report Template

Developed a web-based information resource for dugong conservation (including data on populations, migration, on-going projects) based on the IUCN website.

Regularly updated a directory of experts and organisations concerned with dugong conservation.

Developed networks for cooperative management of shared populations, within or across sub-regions, and where appropriate, formalise cooperative management arrangements.

Cooperated where possible in the establishment of transboundary marine protected areas using ecological rather than political boundaries.

Developed a streamlined format for reporting and exchanging information (through the MOU Secretariat and among Signatory States) on the state of dugong conservation at the national level.

Encouraged Signatory States to become contracting parties to global fisheries agreements such as the UN Fish Stocks Agreement (1995) and the FAO Compliance Agreement (1993) and to implement the FAO Code of Conduct for Responsible Fisheries (1995).

Established relationships with regional fisheries bodies with a view to obtaining data on incidental capture and encourage them to adopt dugong conservation measure within Exclusive Economic Zones (EEZ) and territorial waters.

Determined the most appropriate methods for information and expertise among nations, scientific institutions, non-governmental and international organisations, in order to develop and implement best practice approaches to the conservation of dugongs and their habitats.

Exchanged at regular intervals scientific and technical information and expertise among nations, scientific institutions, non-governmental and international organisations, in order to develop and implement best practice approaches to conservation of dugongs and their habitats.

Disseminated traditional knowledge on dugongs, their habitats and traditional practices for conservation and management in a culturally appropriate manner.

Updated data on dugong populations of regional interest on a regular basis (e.g. country status reports).

Other, please describe: [Click here to enter text.](#)

### **32. Which of the following has your country done to improve coordination among government and non-government sectors and communities in the conservation of dugongs and their habitats?**

Reviewed the roles and responsibilities of government agencies related to the conservation and management of dugongs and their habitats.

Designated a lead agency responsible for coordinating national dugong conservation and management policy.

Identified non-governmental organisations with an interest in dugong conservation and management.

Encouraged cooperation within and among government and non-government sectors, including through the development and/or strengthening of national networks.

Other, please describe: [Click here to enter text.](#)

### **33. What has your country done to develop and implement a regional database of relevant information in relation to dugong conservation and management?**

[Click here to enter text.](#) See CMP Annex 1 for examples of measures/actions.

**34. Which of the following has your country done to encourage Range/Signatory States to incorporate dugong and habitat conservation and protection measures into national legislation?**

Encouraged MOU Signatory States that have not already done so to become Parties to the Convention on Migratory Species (CMS).

Encouraged the establishment of legislation to protect dugongs and their habitats while recognising existing traditional management systems.

Reviewed domestic policies and laws to address gaps or impediments to dugong conservation.

Ensured corporate sanctions for harming dugongs or destroying habitat.

Trained law enforcement authorities.

Raised public awareness to boost surveillance for reporting of illegal activities.

Other, please describe: [Click here to enter text.](#)

**35. Which of the following has your country done to promote capacity building at all levels to strengthen conservation measures?**

Identified needs for capacity-building in terms of human resources, knowledge and facilities.

Provided and/or coordinated training (e.g. through workshops) in conservation and management techniques for dugongs and their habitats to relevant agencies, individuals and local communities.

Developed partnerships with universities, research institutions, non-government organisations, training bodies and other relevant organisations to support capacity building initiatives.

Identified, assessed, developed and implemented training programmes for local communities, non-government organisations, community-based organisations, media, enforcement officers, policy makers, law makers and decision makers.

Enhanced capacity at all levels to develop and undertake joint research programmes on dugong and their habitats.

Organised forums (local, national and regional as appropriate) with the involvement of all relevant stakeholders to enable knowledge sharing and capacity building.

Provided training on development, implementation and monitoring of community rehabilitation programmes.

Supported local communities and relevant national organisations with necessary basic equipment and facilities to enable protection, conservation and management of dugong and their habitats.

Other, please describe: [Click here to enter text.](#)

PLEASE PROCEED TO SECTION 7

## Section 7: Implementation of the MOU

Questions in Section 7 address the following objectives and actions of the Dugong MOU Conservation and Management Plan:

- **Objective 7: Promote implementation of the MOU**
  - 7.1 Encourage participation in the MOU
  - 7.2 Support the Secretariat
  - 7.3 Seek resources
  - 7.4 Synergies with other conventions

### **36. Which of the following has your country done to encourage all Range States to participate in the MOU and its conservation and management activities?**

Encouraged non-Signatory States to sign the MOU.

Arranged regional and sub-regional workshops involving non-Signatory States to raise awareness of the MOU.

Other, please describe: Click here to enter text.

### **37. What, if anything, has your country done to support the Dugong MOU Secretariat to ensure the objectives of the CMP are met?**

Click here to enter text. See CMP Annex 1 for examples of measures/actions.

### **38. Which of the following actions has your country undertaken to seek resources that support the implementation of the Dugong MOU (at either a national or international level)?**

Prioritised conservation and management activities for funding. This has been done and is currently being followed up.

Explored funding options with governments and other donors (such as the Asian Development Bank, World Bank, UNDP, European Union, UNEP, GEF). A Transboundary concept has been developed between Kenya and Tanzania and it is targeting UNEP for funding

Solicited funding and other contributions from industries that have impacts on dugongs and their habitats (e.g. fisheries, tourism, oil industry, real estate). This has not been done

Explored international funding support and other incentives for Signatory States that effectively manage populations. This has not been done

Other, please describe: Click here to enter text. We have a joint project in the WIO by WIOMSA

### **39. What, if anything, has your country done to create links and develop synergies with other relevant regional conservation conventions, MOUs and agreements?**

Currently, Kenya is implementing the regional dugong project funded by WIOMSA MASMA in collaboration with other regional range states signatories to the MOU. It is envisaged that the population of dugongs in the western Indian Ocean will be well documented after the project and a database established.

Currently, Kenya and Tanzania is working together on the establishment of a Transboundary Marine Conservation Area that shall enhance and promote the implementation of the MOU.

Locally, there is a strong partnership between government institutions, the private sector and Conservation NGOs such as WWF, East African Wildlife Society, IFAW, Colobus Trust and the Watamu Marine Association amongst others in promoting the implementation of the MEAs and MOUs.

PLEASE PROCEED TO SECTION 8

## Section 8: Country priorities & additional comments

### 40. How much of a priority is each of the objectives below to your country?

Objective	High	Med	Low
1.1 Threats facing dugong populations	<input type="checkbox"/>		
1.2 Dugong mortality in fishing activities	<input type="checkbox"/>		
1.3 Dugong mortality due to human activities	<input type="checkbox"/>		
1.4 Illegal take of dugongs	<input type="checkbox"/>		
1.5 Sustainable dugong use	<input type="checkbox"/>		
2.1 Dugong populations and habitats	<input type="checkbox"/>		
2.2 Dugong research	<input type="checkbox"/>		
2.3 Data collection and analysis	<input type="checkbox"/>		
3.1 Dugong habitat mapping	<input type="checkbox"/>		
3.2 Dugong habitat protection	<input type="checkbox"/>		
3.3 Actions to address habitat loss	<input type="checkbox"/>		
3.4 Degraded dugong habitats	<input type="checkbox"/>		
4.1 Research of habitats	<input type="checkbox"/>		
5.1 Information programmes	<input type="checkbox"/>		
5.2 Encourage local community participation	<input type="checkbox"/>		
6.1 Combat illegal trade	<input type="checkbox"/>		
6.2 Exchange information	<input type="checkbox"/>		
6.3 Improve coordination	<input type="checkbox"/>		
6.4 Database	<input type="checkbox"/>		
7.1 Encourage participation in the MOU	<input type="checkbox"/>		
7.2 Support the Secretariat	<input type="checkbox"/>		
7.3 Seek resources	<input type="checkbox"/>		
7.4 Synergy with other conventions	<input type="checkbox"/>		
8.1 Incorporation into national legislation	<input type="checkbox"/>		
8.2 Legal protection	<input type="checkbox"/>		
9.1 Promote capacity building	<input type="checkbox"/>		

### 41.

**41. Do you have any other comments you would like to add?**

Click here to enter text.

END OF REPORT
