TEMPLATE FOR THE SUBMISSION OF NATIONAL REPORTS

GENERAL INFORMATION

Signatory/Range State: FRANCE / MAYOTTE
Which agency or institution has been primarily responsible for the preparation of this report? French Agency for Biodiversity / French Ministry of Ecology
List any other agencies, institutions, or NGOs that have provided input:
Memorandum in effect in Signatory State since (dd/mm/yyyy): 31/10/2007
Date of report being submitted: (dd/mm/yyyy): 27/02/2017
Designated Focal Point (and full contact details): National level: Florian EXPERT, florian.expert@developpement-durable.gouv.fr ; Mayotte: Marine Natural Park of Mayotte / French Agency for Biodiversity, katia.ballorain@afbiodiversite.fr

INSTRUCTIONS FOR COMPLETION:

The purpose of completing the national report is to provide information on your country's implementation of the Dugong MoU including, as far as possible, contributions of cooperating non-governmental partners. For each main objective and its associated sub-objectives, you are required to rate an order of priority (High, Medium or Low) from a national perspective, as well as a regional perspective where this is possible. This information will allow us to collate regional and global priorities for conservation and management actions. It will also provide an indication of what has been done already (helping to avoid duplication of effort); what is generally not being done (gaps that need to be addressed); and what interventions or specific assistance may be required.

The reporting template is divided into these nine main objectives, and asks specific questions in relation to the activities that need to be carried out to fulfil those objectives.

To check the boxes on the left hand side, bring the cursor to the middle of the check box and double click with left mouse button on the box field, select "checked" and "ok".

Text boxes can be expanded to accommodate longer answers or to explain and provide additional information, beyond what is requested. Details of future plans are especially encouraged. Wherever possible, please try to indicate the source of information used to answer a particular question, if a published reference is available. Remember that you are sharing information with other countries about your progress, so it may be of benefit to them.

Implementation will be assessed in terms of the nine objectives of the Conservation and Management Plan (CMP). You may find it useful to refer to the CMP document when completing the National Report. The CMP can be found at: http://www.cms.int/species/dugong/pdf/Dugong_CMP_Eng.pdf.

Deadline for submission of National Reports is 15 October 2012. Reports must be received by this date to allow time for collation of results prior to presentation at the Second Signatory State Meeting (SS2) on 4 – 5 December 2012.

Please submit the completed report to the UNEP/CMS Office – Abu Dhabi by email (CmsOffice.ae@cms.int) as a Word attachment. Feel free to attach additional material (published reports, maps, etc.) to this template and send them by e-mail or by post.

NB. If a Range State has more than one territory, a National Report should be submitted for each territory and addressed in the specific context of the particular sub-region or region.

* Free text field for specific descriptions of actions taken. Use additional paper if necessary. If you ticked O for Completed but out of Date, above, please provide date details.

There use to be an abundant dugong population in Mayotte. Its decline started in the 70s mainly because of overexploitation for meat consumption. Nowadays the population is highly depleted (no more than 10 individuals remains in the lagoon). The species is now protected. Poaching does not seem to occur anymore and the main contemporary threat seems to be bycatch in the traditional net fishery.

In Mayotte, several measures already exist to prevent threats to dugongs:

- The dugong has been protected by law in French territories (including Mayotte island) since 1995.
- Net use is restricted
- Mayotte's marine protected area was created in January 2010 (almost 70 000 km² around Mayotte island).
- Awareness campaigns are planned in 2012 and have been conducted these last years (media, school, village, poster campaign).
- A national action plan for dugong is started in 2012.
- A stranding network has been created and involves population health assessments. It provides opportunities to collect data over time and across a broad range of locations, allowing continuous and long-term studies, and supplementing professional monitoring schemes.

Bycatch in fishing nets is the main actual threat for the dugong in Mayotte. Several measures already exist to prevent dugong mortality in fishing activities:

- Net use has been restricted in Mayotte since 1997. Since 2004, according to this local law: nets are forbidden on coral reefs, seagrass beds and mangroves; mesh size should not be larger than 6cm, net should be maximum 300m large and drift nets are forbidden. Unfortunately this legislation is poorly enforced.
- The Natural Marine Park of Mayotte was created in January 2010
- A national action plan for dugong is started in 2012.
- Alternative fishing methods have been experimented and did not succeed.
- A stranding network has been created and involves population health assessments. It provides opportunities to collect data over time and across a broad range of locations.

Other contemporary threats may exist such as: collision with motor boats, seagrass degradation, acoustic pollution and increase of pollutant concentrations in coastal waters. But currently they are poorly documented and far less important than bycatch.

Several measures already exist to prevent these to dugongs:

- The Natural Marine Park of Mayotte was created in January 2010
- A national action plan for dugong is started in 2012.

 The dugong has been protected by law in French territories (except New-Caledonia, including Mayotte island) since 1995. However bycatch in fishings nets still exist and in these cases, animals are always kept for meat consumption.

Three methods were used:

- Strip transect aerial surveys (between 2006 and 2008);
- Collection of opportunistic observations (between 2002 and 2012);
- Interviews survey conducted on willing fishermen (2007 and 2014).

The results suggested that dugongs now mainly occur in the eastern portion of the lagoon of Mayotte and in particular in 3 major areas. And no more than 10 individuals remains in the lagoon.
