12th MEETING OF THE CONFERENCE OF THE PARTIES
Manila, Philippines, 23 - 28 October 2017
Agenda Item 26.2

**DESIGNATION OF SPECIES FOR CONCERTED ACTIONS
FOR THE TRIENNIUM 2018-2020**

(Prepared by the Secretariat)

Summary:

In line with the provisions of Resolution 11.13, the Secretariat has merged the lists of species designated for Concerted and Cooperative Actions for the triennium 2015-2017, into one single list, as a basis for the deliberations of the 12th Meeting of the Conference of the Parties on the species to be designated for Concerted Actions for the triennium 2018-2020.

The document also summarizes proposals for Concerted Actions submitted for consideration by the 12th Meeting of the Conference of the Parties.

DESIGNATION OF SPECIES FOR CONCERTED ACTIONS FOR THE TRIENNIUM 2018-2020

Background

1. Concerted Actions were established by Resolution 3.2 in 1991, which instructed the Secretariat and the Scientific Council to encourage and assist Parties to take such actions to implement the provisions of the Convention, and initiated a process for each meeting of the COP to recommend initiatives to benefit a selected number of Appendix I-listed species.
2. Cooperative Actions were established by Recommendation 5.2 in 1997, in response to the practical limits to the number of Agreements that could be developed and implemented simultaneously for the long list of species on Appendix II. The Recommendation encouraged Parties to undertake *cooperative action* to improve the conservation status of relevant species or populations of species listed on Appendix II; providing for relatively rapid action either as an alternative to an Agreement or as the precursor to one.
3. The 10th and 11th meetings of the Conference of the Parties to CMS (COP10 and COP11) reviewed the Concerted and Cooperative Actions processes (see documents [UNEP/CMS/Conf.10.36](#) and [UNEP/CMS/COP11/Doc.22.4](#) for details). Through [Resolution 10.23](#) and [Resolution 11.13](#), the Conference of the Parties made a series of decisions aimed at enhancing the effectiveness of the processes. In particular, COP11 decided that the two processes of Concerted Actions (normally for selected Appendix I species) and Cooperative Actions (normally for selected Appendix II species) be consolidated within one process of Concerted Action.
4. To effect this consolidation, all proposals from COP12 onwards should be made for Concerted Actions only. The Concerted Actions mechanism will be applicable to both Appendix I- and Appendix II-listed species, and its scope will broaden to include all of the kinds of activity previously pursued through Cooperative Actions, as well as those normally pursued through Concerted Actions. The Cooperative Actions mechanism itself will cease to exist.
5. Species previously designated for cooperative action, but for which no activity has yet begun, will be transferred into a new unified Concerted Actions list. The list will be subject to review by the Scientific Council and the COP, to determine whether each such species should remain listed or be deleted.
6. Projects and initiatives already begun as Cooperative Actions under earlier COP decisions will continue unaffected. These too however will be subject to review by the Scientific Council and the COP. Such reviews may conclude, *inter alia*, that the objectives of a given action have been achieved and it has been completed, or that it should continue within the terms of the unified Concerted Actions mechanism (and be re-named accordingly).

Consolidation of the lists of species designated for Concerted and Cooperative Actions

7. In line with the provisions of Resolution 11.13, the Secretariat has merged the lists of species designated for Concerted and Cooperative Actions for the triennium 2015-2017, into one single list, as a basis for COP12 deliberations on the species to be designated for Concerted Actions for the triennium 2018-2020. The consolidated list is attached to this document as Annex 1.
8. This consolidated list is expected to be reviewed by the 2nd meeting of the Sessional Committee of the Scientific Council, which may make recommendations to COP12 on whether each species on the list should be designated for Concerted Actions for the

triennium 2018-2020 and therefore be maintained on the list, or be deleted. The list as revised and agreed by COP12 will be annexed to Resolution 12.[xx] on Concerted Action as the list of species designated for Concerted Actions for the triennium 2018-2020 (see UNEP/CMS/COP12/Doc.26.1).

Proposals for Concerted Actions

9. Resolution 11.13 encourages Parties to ensure that all initiatives to undertake Concerted Actions include a specification of the conservation and institutional outcomes expected and the timeframes within which these outcomes should be achieved. It also recommends that proposals for future Concerted Action listing decisions should include a specification of certain standard items of information detailed in the Resolution.
10. Pursuant to these provisions, Parties and other stakeholders have developed and submitted proposals for Concerted Actions for consideration at COP12. The supporting statements are made available as separate documents (UNEP/CMS/COP12/Doc.26.2.x).
11. Five of the proposals submitted (European Eel, Angelshark, Mobulid rays, Whale Shark, Asian Great Bustard) concern species presently not designated for Concerted or Cooperative Actions.
12. In the case of the Angelshark, the species is currently not listed on the CMS Appendices, while a proposal for its inclusion in both Appendix I and II has been submitted to COP12 for consideration. A possible designation of the species for Concerted Actions is therefore subject to a COP12 decision to include the species in at least one of the appendices.
13. Three of the proposals concern species (Atlantic Humpback Dolphin), or populations of species (Eastern Tropical Pacific Sperm Whales and Arabian Sea Humpback Whales) which are presently already designated for Concerted Actions. For these species or populations, the proposals aim therefore to define the conservation action to be undertaken under the current designation.
14. The 2nd Meeting of the Sessional Committee of the Scientific Council is expected to make recommendations to the Conference of the Parties on the merit of the designation of the species for Concerted Actions, where appropriate, and on the proposed activities.
15. COP12 is expected to decide on the designation of the species for Concerted Actions and the endorsement of the proposed conservation activities. Species not already included will be added to the list of species designated for Concerted Actions annexed to Resolution 12.[xx] on Concerted Actions.

Recommended Actions:

16. The Conference of the Parties is recommended to:
 - a) Review and finalize the list of species designated for Concerted Actions for the triennium 2018-2020 contained in Annex I; and
 - b) Review the proposals for Concerted Actions and make decisions as regards the approval or rejection of each proposal.
