

**CONVENTION ON
MIGRATORY
SPECIES**

Distribution: General

UNEP/CMS/Resolution 9.21 (Rev.COP12)

Original: English

SAHELO-SAHARAN MEGAFUNA*

Adopted by the Conference of the Parties at its 12th Meeting (Manila, October 2017)

Recognizing that the large mammal fauna of the arid lands of North Africa and Eurasia have many species with threatened populations that are in a profoundly unsatisfactory, and often critical, state of conservation,

Conscious that the arid lands, with their exceptional natural and cultural heritage and their unique migration phenomena, are a crucial area for the action of the Convention,

Recalling that several species found in that biome are on Appendix I of the Convention,

Noting that recommendation 4.5 adopted by the Conference of the Parties at its Fourth Meeting (Nairobi, 7-11 June 1994) requested that the Scientific Council, in cooperation with the Secretariat, establish a Concerted Action for Sahelo-Saharan Ungulates,

Noting with satisfaction the progress made by this Sahelo-Saharan Ungulates Concerted Action,

Taking into account the intersessional process on the future shape of CMS, and *conscious* that the development of new instruments is to be linked to this process, and

Acknowledging the recommendation of the 14th and 15th meetings of the Scientific Council that the SAHELO-SAHARAN UNGULATES CONCERTED ACTION be continued and extended to other species of large mammals occurring within the area of the Concerted Action,

*The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals*

1. *Encourages* Range States and other interested Parties to prepare, in cooperation with the Scientific Council and the Secretariat, the necessary proposals to include in Appendix I or Appendix II threatened species that would benefit from the Action;
2. *Encourages* the Secretariat to pursue efforts to bring into the Convention, Range States of the Sahelo-Saharan fauna that are not yet Parties, and to liaise with other concerned Conventions to enhance synergies;
3. *Urges* non-Party Range States to support the Action, in recognition of its global significance; and
4. *Encourages* the Scientific Council and the Secretariat to envisage, in consultation with the Range States concerned, an extension of the action area to the deserts of the Horn of Africa and associated biomes.

* Previously Recommendation 9.2.
