

# Convention on the Conservation of Migratory Species of Wild Animals

# Format for reports of Parties on implementation of the Convention on the Conservation of Migratory Species of Wild Animals (revision of June 2003)

Reporting format agreed by the Standing Committee at its 26th Meeting (Bonn, June 2003) for mandatory use by Parties, for reports submitted to the Eighth Meeting of the Conference of the Parties (COP8) (Nairobi, 2005).

The questions below combine elements of Resolution 4.1 (Party Reports) adopted by the Fourth Meeting of the Conference of the Parties (Nairobi, June 1994) and Resolution 6.4 (Strategic Plan for the Convention on Migratory Species 2000-2005), adopted by the Sixth Meeting of the Conference of the Parties (Cape Town, November 1999), as well as commitments arising from other operational Resolutions and Recommendations of the Conference of the Parties.

<u>Please refer to the separate instructions on completing the report</u>. Parties are encouraged to respond to all questions, since it cannot be assumed that the absence of a response indicates that no activities taken have place in the current reporting period. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

Which agency	has been	nrimarily	responsible	for the	preparation	of this	report?

# I(b). Additional General Information

1	Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)
	ASCOBANS: Ministry of Food, Agriculture and Fisheries
1a	If more than one government department is involved, describe the interaction/relationship between these government departments:
	ASCOBANS: Cooperating in developing the action plan 2005 in order to reduce bycatch of small cetaceans

2	List the main non-governmental organizations actively involved in initiatives for the conservation of migratory species in your country, and describe their involvement:
	Danish Ornithological Society
	WWF
	Danish Hunters Association
	Danish Nature Protection Society
3	Describe any involvement of the private sector in the conservation of migratory species in your country:
	Aage V. Jensen's Foundations are involved in buying and conserving important habitats including important habitats for migratory birds
4	Note any interactions between these sectors in the conservation of migratory species in your country:
	The NGO's are used as official consultants for the Ministry of Environment through the The Game Management Council.

### II. Appendix I species

#### 1. BIRDS

#### 1.1 General questions on Appendix I bird species

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I bird species:
	Danish Forest and Nature Agency
2	Is the taking of all Appendix I bird species prohibited by the national implementing  Legislation cited in Table I(a) (General Information)?  If other legislation is relevant, please provide details:
2a	If the taking of Appendix I bird species is prohibited by law, have any exceptions    Yes No been granted to the prohibition?
	If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I bird species:
	None (the only relevant species for Denmark is The White-tailed Eagle Haliaetus albicilla)
3a	What actions are being undertaken to overcome these obstacles?
	Not applicable
3b	What assistance, if any, does your country require in order to overcome these obstacles?
	Not applicable
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger bird species, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
	White-tailed Eagle <i>Haliaetus albicilla</i> : This species began re-immigration as a breeding bird in Denmark in 1996. 16 pairs have been breeding successfully in 2004. Where necessary, public access around the nest sites have been prohibited.
	White-headed Duck <i>Oxyura leucocephala</i> : Following international recommendations it has been decided to try to shoot every specimen of the Ruddy Duck <i>Oxyura jamaicensis</i> which threatens the White-headed Duck by hybridization.
4a	Describe any factors that may limit action being taken in this regard:
	Bad shooting!
4b	What assistance, if any, does your country require to overcome these factors?
	Not applicable

#### 1.2 Questions on specific Appendix I bird species

The following section contains a table for each Appendix I bird species for which your country is considered to be a Range State. Please complete each table as appropriate, providing information in summary form. Where appropriate, please cross-reference to information already provided in national reports that have been submitted under other conventions (e.g. Convention on Biological Diversity, Ramsar Convention, CITES). (Attach annexes as necessary.)

Spe	cies Haliaeetus albicilla – Common Name(s) White-tailed Eagle	
1	Is your country a Range State for this species?	⊠ Yes □ No
2	Please provide published distribution reference: Nyegaard, T. & Grell, M.B. 200 Denmark 2004. Dansk Ornitologisk Forenings Tidsskrift 99 (2): 95.	5: Rare and threatened breeding birds in

3	Summarise information on population size, trends and distribution (if known):
	The White-tailed Eagle began re-immigration as a breeding bird in Denmark in 1996. The population trend is increasing, with distribution in the southern part of the country. 16 pairs have been breeding in 2004.
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)
	Research
	☐ Species protection
	☐ Species restoration
	Habitat restoration
	⊠ Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:
	The immigration of the species will currently be followed and conservation measures considered.
Spec	cies Anser erythropus – Common Name(s) Lesser White-fronted Goose
1	Is your country a Range State for this species?
2	Please provide published distribution reference:
	Olsen, K.M. 1992: Danmarks Fugle – en oversigt. Dansk Ornitologisk Forening. 216 pp.
3	Summarise information on population size, trends and distribution (if known):
	A very rare visitor.
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)
	Research
	☐ Monitoring
	☐ Species protection
	☐ Species restoration
	Habitat protection
	Habitat restoration
	☐ Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:
Spec	cies Aythya nyroca – Common Name(s) Ferruginous Pochard, Ferruginous Duck
1	Is your country a Range State for this species?   Yes No
2	Please provide published distribution reference:
	Olsen, K.M. 1992: Danmarks Fugle – en oversigt. Dansk Ornitologisk Forening. 216 pp.
3	Summarise information on population size, trends and distribution (if known):
	A very rare visitor.

4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)
	Research
	☐ Monitoring
	☐ Species protection
	☐ Species restoration
	Habitat protection
	Habitat restoration
	Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:
C	
-	cies Polysticta stelleri – Common Name(s) Steller's Eider
1	Is your country a Range State for this species?  \( \sum \text{Yes}  \text{No} \)
2	Please provide published distribution reference:
	Olsen, K.M. 1992: Danmarks Fugle – en oversigt. Dansk Ornitologisk Forening. 216 pp.
3	Summarise information on population size, trends and distribution (if known):
	A very rare visitor.
4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)
	Research
	☐ Monitoring
	☐ Species protection
	☐ Species restoration
	Habitat protection
	Habitat restoration
	Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:
<u> </u>	
Spec	cies Acrocephalus paludicola – Common Name(s) Aquatic Warbler
1	Is your country a Range State for this species?
2	Please provide published distribution reference:
	Olsen, K.M. 1992: Danmarks Fugle – en oversigt. Dansk Ornitologisk Forening. 216 pp.
3	Summarise information on population size, trends and distribution (if known):
	A very rare visitor.

4	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available.)
	Research
	☐ Monitoring
	☐ Species protection
	Species restoration
	☐ Habitat protection
	Habitat restoration
	Other
5	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
6	Describe any future activities that are planned for this species:
isted specie	
Spe	cies name, Common Name(s):
1	Please provide published distribution reference:

	☐ Species restoration	

	Habitat protection
	Habitat restoration
	☐ Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species?
Miscellaneous information or comments on Appendix I marine turtles in general:	

#### 4 TERRESTRIAL MAMMALS (OTHER THAN BATS)

#### 4.1 General questions on Appendix I terrestrial mammals (other than bats)

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed terrestrial mammals (other than bats):
	Danish Forest and Nature Agency (none of these species are occurring in Denmark)
2	Is the taking of all Appendix I terrestrial mammals (other than bats) prohibited by The national implementing legislation cited in Table I(a) (General Information)?  If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I terrestrial mammals (other than bats) is prohibited by  Law, have any exceptions been granted to the prohibition?  Yes No
	If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I terrestrial mammals (other than bats):
3a	What actions are being undertaken to overcome these obstacles?
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of terrestrial mammal (other than bats), including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
4a	Describe any factors which limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

#### 4.2 Questions on specific Appendix I terrestrial mammals (other than bats)

If you have information indicating that your country should be considered a Range State for any terrestrial mammal species (other than bats) that is listed in CMS Appendix I, please complete a table (provided below) for each species.

Spe	Species name, Common name(s):		
1	Please provide published distribution reference:		
2	Summarise information on population size, trends and distribution (if known):		
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):		
	Research		
	☐ Monitoring		
	☐ Species protection		
	☐ Species restoration		

	Habitat protection
	☐ Habitat restoration
	☐ Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species:
Misc	ellaneous information or comments on Appendix I terrestrial mammals (other than bats) in general:

#### 5 BATS

#### 5.1 General questions on Appendix I bats

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed bats:
	Danish Forest and Nature Agency (none of these species are occurring in Denmark)
2	Is the taking of all Appendix I bats prohibited by the national implementing  Legislation cited in Table I(a) (General Information)?  If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I bats is prohibited by law, have any exceptions  Been granted to the prohibition?  If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I bats:
3a	What actions are being undertaken to overcome these obstacles?
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of bats, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
4a	Describe any factors that may limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

#### 5.2 Questions on specific Appendix I bat species

If you have information indicating that your country should be considered a Range State for any bat species that is listed in CMS Appendix I, please complete a table (provided below) for each species.

Spe	Species name, Common name(s):	
1	Please provide published distribution reference:	
2	Summarise information on population size, trends and distribution (if known):	
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):  Research  Monitoring  Species protection  Species restoration

#### 6 OTHER TAXA

#### 6.1 General questions on Appendix I species belonging to other taxa

1	Identify the Ministry, agency/department, or organisation responsible for leading actions relating to Appendix I listed species belonging to taxa not included in sections 1-5 above:
	Danish Forest and Nature Agency (none of these species are occurring in Denmark)
2	Is the taking of all Appendix I species belonging to taxa not included in sections 1-5 above, prohibited by the national legislation listed as being implementing legislation in Table I(a) (General Information)?
	If <i>other</i> legislation is relevant, please provide details:
2a	If the taking of Appendix I species belonging to taxa not included in sections 1-5 above is prohibited by law, have any exceptions been granted to the prohibition?
	If Yes, please provide details (Include the date on which the exception was notified to the CMS Secretariat pursuant to CMS Article III(7)):
3	Identify any obstacles to migration that exist in relation to Appendix I species belonging to taxa not included in sections 1-5 above:
3a	What actions are being undertaken to overcome these obstacles?
3b	What assistance, if any, does your country require in order to overcome these obstacles?
4	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species belonging to taxa not included in section 1-5 above, including strictly controlling the introduction of, or controlling or eliminating, already introduced exotic species (Article III(4)(c))?
4a	Describe any factors that may limit action being taken in this regard:
4b	What assistance, if any, does your country require to overcome these factors?

#### 6.2 Questions on specific Appendix I species belonging to other taxa

If you have information indicating that your country should be considered a Range State for any Appendix I listed species that belongs to taxa not included in sections 1-5 above, please complete a table (provided below) for each species.

Spec	Species name, Common name(s):	
1	Please provide published distribution reference:	
2	Summarise information on population size, trends and distribution (if known):	
3	Indicate (with an 'X') and briefly describe any activities that have been carried out in favour of this species in the reporting period. (Please provide the title of the project and contact details, where available):	
	Research	
	☐ Monitoring	
	☐ Species protection	

	☐ Species restoration
	Habitat protection
	Habitat restoration
	☐ Other
4	If no activities have been carried out for this species in the reporting period, what has prevented such action being taken?
5	Describe any future activities that are planned for this species?
Misc	rellaneous information or comments on Appendix I species that belong to taxa not included in sections 1-5 above:
	7 LISTING OF OTHER ENDANGERED MIGRATORY SPECIES IN APPENDIX I
1	Is your country a Range State for any other endangered migratory species   No not currently listed in Appendix I?  If Yes, please provide details:
1a	Is your country taking any steps to propose listing any of these species?
	If Yes, please provide details:
1b	What assistance, if any, does your country require to initiate the listing of these species?

# III. Appendix II Species

#### 1. INFORMATION ON APPENDIX II SPECIES

Information pertaining to the conservation of Appendix II species that are the object of CMS Agreements will have been provided in periodic Party reports to those instruments. It will suffice therefore to reference (below), and preferably append, a copy of the latest report that has been submitted to the secretariat each of the Agreement/MoUs to which your country is a Party.

WADDEN SEA SEALS (1991)	
Period covered: 1996-2001	
Period covered: 2000-2004	
Period covered: 2003-2004	
Period covered: 2002 – 2005	

#### 2. QUESTIONS ON CMS AGREEMENTS

#### 2.1 Questions on the development of new CMS Agreements relating to birds

	2.1 Questions on the development of new CWS Agreements relating to birds
1	In the current reporting period, has your country <b>initiated</b> the development of any  CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II bird species?
	If Yes, what is the current state of development?
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II bird species?
	If Yes, please provide details:
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?
4	Is the development of any CMS Agreement for birds, including Memoranda of Understanding, planned by your country in the foreseeable future?  If Yes, please provide details:
	2.2 Questions on the development of new CMS Agreements relating to marine mammals
1	In the current reporting period, has your country <b>initiated</b> the development of any  CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II marine mammal species?  If Yes, what is the current state of development?
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II marine mammal species?  If Yes, please provide details:

3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?
4	Is the development of any CMS Agreement for marine mammals, including  Memoranda of Understanding, planned by your country in the foreseeable future?  If Yes, please provide details:
L	2.3 Questions on the development of new CMS Agreements relating to marine turtles
1	In the current reporting period, has your country <b>initiated</b> the development of any  CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II marine turtles?  If Yes, what is the current state of development?
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II marine turtles?  If Yes, please provide details:
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?
4	Is the development of any CMS Agreement for marine turtles, including  Memoranda of Understanding, planned by your country in the foreseeable future?  If Yes, please provide details:
	2.4 Questions on the development of new CMS Agreements relating to terrestrial mammals (other than bats)
1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II terrestrial mammal species (other than bats)?  If Yes, what is the current state of development?
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II terrestrial mammal species (other than bats)?  If Yes, please provide details:
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?
4	Is the development of any CMS Agreement for terrestrial mammals (other than bats), including Memoranda of Understanding, planned by your country in the foreseeable future?  If Yes, please provide details:
	2.5 Questions on the development of new CMS Agreements relating to bats
1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II but species?
	If Yes, what is the current state of development?
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of Appendix II bat species?  If Yes, please provide details:

3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?
4	Is the development of any CMS Agreement for bats, including Memoranda of Understanding, planned by your country in the future?  If Yes, please provide details:
	2.6 Questions on the development of new CMS Agreements relating to other taxa
1	In the current reporting period, has your country <b>initiated</b> the development of any CMS Agreements, including Memoranda of Understanding, to address the conservation needs of Appendix II species belonging to taxa not included in sections 1-6 above?  If Yes, what is the current state of development?
2	In the current reporting period, has your country <b>participated</b> in the development of any CMS Agreements, including Memoranda of Understanding, which address the conservation needs of species belonging to taxa not included in sections 1-6 above?  If Yes, please provide details:
3	If your country has initiated or is participating in the development of an Agreement or Memorandum of Understanding, what assistance, if any, does your country require in order to initiate or participate in the instrument's development?
4	Is the development of any CMS Agreement for other taxa, including Memoranda of Understanding, planned by your country in the foreseeable future?  If Yes, please provide details:
	3. LISTING OF MIGRATORY SPECIES IN APPENDIX II
1	Is your country a Range State for any migratory species that has an unfavourable conservation status, but is <u>not</u> currently listed in Appendix II and could benefit from the conclusion of an Agreement for its conservation?  If Yes, please provide details:
1a	Is your country taking any steps to propose the listing of this/these species in Appendix II? Yes No
	If Yes, please provide details:
1b	What assistance, if any, does your country require to initiate the listing of this/these species?

# IV. National and Regional Priorities

1	What priority does your country assign to the conservation and,
2	Are migratory species and their habitats addressed by your country's national Yes No
	biodiversity strategy or action plan?
	If Yes, please indicate and briefly describe the extent to which it addresses the following issues:
	☐ Conservation, sustainable use and/or restoration of migratory species
	Conservation, sustainable use and/or restoration of the habitats of migratory species, including protected areas
	Actions to prevent, reduce or control factors that are endangering or are likely to further endanger migratory secies (e.g. alien invasive species or by-catch)
	Minimising or eliminating barriers or obstacles to migration
	Research and monitoring of migratory species
	☐ Transboundary co-operation
3	Does the conservation of migratory species currently feature in any other national or regional policies/plans (apart from CMS Agreements)  If Yes, please provide details:
3a	Do these policies/plans cover the following areas (if Yes, please provide details):
Ja	Do these policies/plans cover the following areas (if Tes, please provide details).
	Yes No
	Economic development
	Land-use planning
	Pollution control
	Designation and development of protected areas
	Development of ecological networks
	Planning of powerlines
	Planning of fences
	Planning of dams
	Other (wind farms)
	V. Protected Areas
1	Are migratory species taken into account in the selection, establishment and management of protected areas in your country?
	If Yes, please provide details:
	Occurrence of migratory bird species is an important criterium for designating Special Protected Areas according to the EEC Birds Directive, and many areas have been designated in Denmark for protection of these migratory bird species.
1a	Do these protected areas cover the following areas? (If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas):
	Yes No
	⊠ □ Aquatic

	Marine Marine
1b	Identify the agency, department or organization responsible for leading on this action in your country:
	Danish Forest and Nature Agency
	VI. Policies on Satellite Telemetry
1	In the current reporting period, has your country undertaken
	If Yes, please provide details (Indicate <i>inter alia</i> the scientific justification for the research, describe briefly the measures taken to ensure that risks to the welfare of individual animals and – in the case of severely depleted populations – to the species are minimised, and summarise the results obtained):
	Pink-footed Goose: a total of 14 adult males have been mounted with satelite transmitters (back packs), during the springs 2003 and 2004, in Denmark with the aim to follow their migration to the Svalbard breeding grounds. The project has successfully identified spring-staging and hitherto unknown pre-nesting areas and staging periods as well as breeding sites and moulting sites. The results can be viewed on <a href="https://www.dmu.dk">www.dmu.dk</a> . Migratory behaviour, mating status and body condition (assessed by an abdominal profile index) was similar to the population general.
	A total of 12 light-bellied brent geese have been followed on migration to their breeding grounds in 1997 and 2001. The aim of the project has been to identify unknown staging areas/staging behaviors of this endangered fly-way population of geese. The study has been highly successful in demonstrating a hitherto unknown linkage between Greenland and Svalbard breeding brent geese, and by identifying important staging areas in the western parts of Spitsbergen. The attachment method used cause transmitters only to temporarily stay on the birds. The method had previously been tested on other goose species, and was considered harmless to the birds behaviour and migratory abilities. Indeed all transmittermarked light-bellied brent geese survived the catch, handling and tracking, and returned to the wintering areas the following winter.
2	Are any future conservation/research projects planned that will use
	satellite telemetry?
	If Yes, please provide details (including the expected timeframe for these projects):
	The Department of Coastal Zone Ecology of the National Environmental Research Institute hopes in the near future to be able to satellite-track bean geese, black scooters and pintail. The aim of the projects will be to improve our understanding of the flyway-delinieation of bean geese wintering in Denmark, exact breeding locations and potential stop-over use of black scooters wintering in Denmark, and exact wintering locations of pintail staging in Denmark autumn and spring. All species or closely related species has already been subject to several successful tracking studies in North America. The time-frame is uncertain, because the projects awaits funding.
	Pink-footed Goose: no further plans. Important questions have been answered by the previous project.
	If No, please explain any impediments or requirements in this regard:
	VII. Membership
1	Have actions been taken by your country to encourage non-Parties   Yes   No  to join CMS and its related Agreements?
	If Yes, please provide details. (In particular, describe actions taken to recruit the non-Parties that have been identified by the Standing Committee as high priorities for recruitment.)
	[It is a primary goal in the Danish international assistance strategy to support the ratification and implementation of international nature protection related agreements and conventions. More specific efforts have been made with the Baltic and East European States.]spørg CARTSEN LUND
1a	Identify the agency, department or organization responsible for leading on this action in your country:

Ministry of Environment and Ministry of Foreign Affairs

# VIII. Global and National Importance of CMS

1	Have actions been taken by your country to increase national, regional and/or global awareness of the relevance of CMS and its global importance in the context of biodiversity conservation?  If Yes, please provide details:  [It is a primary goal in the Danish international assistance strategy to raise awareness of international nature protection related agreements and conventions. More specific efforts have been made with the Baltic and East European States.]
2	Identify the agency, department or organization responsible for leading on this action in your country:
	Ministry of Environment and Ministry of Foreign Affairs

# IX. Mobilization of Resources

1	Has your country made financial resources available for conservation activities having    Yes    No direct benefits for migratory species in your country?
	If Yes, please provide details (Indicate the migratory species that have benefited from these activities):
	Since 1989 the Danish Forest and Nature Agency has in cooperation with the regional counties realised several hundred nature restoration projects. All of these restored nature areas have larger or smaller direct benefits for migratory species. In addition, about 50 hunting and disturbance free wildlife reserves have been established since 1996.
2	Has your country made voluntary contributions to the CMS Trust Fund to support requests from developing countries and countries with economies in transition?  If Yes, please provide details:
3	Has your country made other voluntary financial contributions to support conservation activities having direct benefits for migratory species in other countries (particularly developing countries)?
	If Yes, please provide details (Indicate the migratory species that have benefited from these activities):
	Substantial contributions to support conservation activities have been given, especially to Guinea-Bissau and the Baltic States. Many of these projects have direct benefits for migratory species.
4	Has your country provided technical and/or scientific assistance to developing countries to facilitate initiatives for the benefit of migratory species?  Yes No  No  Yes No
	If Yes, please provide details (Indicate the migratory species that have benefited from these activities):
	Substantial technical and scientific assistance have been given, especially to Guinea-Bissau and the Baltic States. Many of these projects have direct benefits for migratory species.
5	Has your country received financial assistance/support from the CMS Trust  Fund, via the CMS Secretariat, for national conservation activities having direct benefits for migratory species in your country?
	If Yes, please provide details (Indicate the migratory species that have benefited from these activities):
6	Has your country received financial assistance/support from sources other than the CMS Secretariat for conservation activities having direct benefit for migratory species in your country?
	If Yes, please provide details (Indicate the migratory species that have benefited from these activities):
	The EU-Commission has supported the restoration of about 10 large nature areas with direct benefits for migratory species.

# X. Implementation of COP Resolutions and Recommendations

Please summarize the measures undertaken by your country to implement the substantive, operational Resolutions and Recommendations adopted by the Conference of the Parties, where these have not been mentioned elsewhere in this report, giving particular emphasis to those identified below (as appropriate).

#### Resolutions

Resolution 6.2 – By-catch, and Recommendation 7.2 – Implementation of Resolution 6.2 on By-catch:

In order to reduce by-catch of the Harbour Porpoise *Phocoena phocoena* an action plan has been elaborated, among others including investigations on the size of the by-catch and the use of "pinger" on certain types of gill nets in the North Sea.

Resolution 6.3 – Southern Hemisphere Albatross Conservation: Not applicable

Resolution 7.2 – Impact Assessment and Migratory Species:

Denmark applies, wherever relevant, Environmental Impact Assessments and Strategic Environmental Assessments, e.g. in relation to marine wind farms.

Resolution 7.3 – Oil Pollution and Migratory Species:

Aerial surveys on oil pollution are carried out in co-ordination with neighbouring countries in order to minimize oil-kills of birds at sea. In 2002 the whole Wadden Sea in Denmark, Germany and the Netherlands, and in 2004 the whole Baltic Sea have been designated by IMO (International Maritime Organisation) as PSSA's (Particular Sensitive Sea Areas) in order to minimize the risk of oil pollution.

Resolution 7.4 – Electrocution of Migratory Birds:

Resolution 7.5 – Wind Turbines and Migratory Species:

Resolution 7.9 – Cooperation with Other Bodies and Processes:

Resolution 7.15 – Future Action on the Antarctic Minke, Bryde's and Pygmy Right Whales under the Convention on Migratory Species: Not applicable

#### Recommendations

Recommendation 7.5 - Range State Agreement for Dugong (Dugong dugon) Conservation: Not applicable

Recommendation 7.6 - Improving the Conservation Status of the Leatherback Turtle (Dermochelys coriacea): Not applicable

Recommendation 7.7 – America Pacific Flyway Programme: Not applicable

Other resolutions/recommendations:

#### Other remarks:

# **Annex: Questions on specific Appendix II species**

The tables below contain the list of all species listed in Appendix II. Boxes have been checked to indicate the species for which your country is considered to be a Range State. Please amend the boxes where appropriate. (If you wish to provide further information on any of these species, please attach as an annex.) Please also provide published distribution references where available.

All species of each of the Families below are listed in Appendix II. If your country is a Range State for any of the species in these Families, please enter the species name in the first column, under the relevant Family heading. Please indicate (with a 'X') whether your country is a Range State or the species is extinct and, where appropriate, please provide published distribution references. (Space is provided for ten species in each Family. If additional lines are required, please attach the information as an annex.)
