

Convention on the Conservation of Migratory Species of Wild Animals

FORMAT FOR NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS

Reporting format agreed by the Standing Committee at its 32nd Meeting (Bonn, November 2007) for mandatory use by Parties, for reports submitted to the Tenth Meeting of the Conference of the Parties (COP10) (Norway, 2011).

The questions below combine elements of Resolution 4.1 (Party Reports) adopted by the Fourth Meeting of the Conference of the Parties (Nairobi, June 1994) and Resolution 6.4 (Strategic Plan for the Convention on Migratory Species 2000-2005), adopted by the Sixth Meeting of the Conference of the Parties (Cape Town, November 1999), the COP8 Strategic Plan 2006-2011 and Resolution 8.24 adopted by the Conference of the Parties (Nairobi 2005), as well as commitments arising from other operational Resolutions and Recommendations of the Conference of the Parties.

COP Resolution 9.4 adopted at Rome called upon the Secretariats and Parties of CMS Agreements to collaborate in the implementation and harmonization of online reporting implementation. If the development of an online reporting system advances sufficiently, Parties may have the option of reporting in this manner. There are however no guarantees at this stage that this will be the case.

Parties are encouraged to respond to all questions. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

1	<p>Which other government departments are involved in activities/initiatives for the conservation of migratory species in your country? (Please list.)</p> <p>Manx National Heritage</p>
2	<p>If more than one government department is involved, describe the interaction/relationship between these government departments:</p> <p>DEFA administer the Wildlife Act, advises on wildlife conservation and hold many records. MNH run a bird observatory on the Calf of Man, hold records in addition to DEFA's, run the museum and advise on heritage matters including wildlife. Both departments own and manage land. We coordinate closely.</p>
3	<p>Has a national liaison system or committee been established in your country? Please provide contact information</p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>There is not a formal system dealing specifically with migratory species, but the Wildlife Committee is set up under the Wildlife Act to advise the DEFA on matters relating to the Act or to the protection of birds, other animals or plants. The Island is not large so liaison is relatively easy. A DEFA officer attends Manx Bat Group committee meetings and there are regular liaison meetings with the other non-governmental wildlife conservation organisations (the Conservation Forum).</p>
4	<p>List the main non-governmental organizations actively involved in activities/initiatives for the conservation of migratory species in your country, and describe their involvement:</p> <p>Manx BirdLife (was Manx Bird Atlas) – a charity holding bird records and undertaking surveys. Do consultancy work. Just completed a full atlas project. Half way through repeat breeding bird re-survey.</p> <p>Manx Wildlife Trust – manage nature reserves, do consultancy work, provide wildlife education and advise on wildlife matters.</p> <p>Manx Bat Group – run a bat helpline and rescue service, educate and advise on bat matters and undertake surveys.</p> <p>Manx Basking Shark Watch – research and education.</p> <p>Manx Whale and Dolphin Watch – research and education.</p>
4a	<p>Please provide detail on any devolved government/overseas territory authorities involved.</p> <p>n/a</p>
5	<p>Describe any involvement of the private sector in the conservation of migratory species in your country:</p>
6	<p>Note any interactions between these sectors in the conservation of migratory species in your country:</p>

Miscellaneous information or comments on Appendix I birds in general:

Appendix 1 birds only occur as rare vagrants or escapees. The Manx Bird Atlas was published in 2007, with records of breeding and wintering birds in all terrestrial 1km squares and shows the distributions of resident species and regularly occurring visitors. A database of records to within 100m is maintained. Historical records are summarised in Cullen and Jennings (1986).

2b	Please report on the progress / success of the actions taken. WiSe training for Wildlife Friendly boat operation undertaken in 2008 to encourage responsible marine ecotourism amongst commercial boat operators. See www.wisescheme.org Awareness raising and public sightings scheme has led to records of humpback whales being reported to Manx Whale and Dolphin Watch. Between 2008-2010 there were two confirmed sightings and 2 possible sightings. There has been 1 sighting of a fin whale in the same period. See www.mwdw.net for more information. Manx Whale and Dolphin Watch sightings feed into other cetacean databases and data is shared with other organisations.	
2c	What assistance, if any, does your country require in order to overcome these obstacles?	
3	What are the major pressures on Appendix I marine mammal species (transcending mere obstacles to migration)? Pollution <input type="checkbox"/> By-catch <input type="checkbox"/> Other (please specify)	
3a	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species of marine mammal beyond actions to prevent disruption to migrating behaviour? WiSe course as above. Marine mammal strandings are monitored The Isle of Man is linked into the UK Cetacean Strandings Investigation Programme and sends records of all marine mammal strandings to the programme. The Isle of Man is building capacity to carry out cetacean post-mortems and a local vet has attended relevant training and has assisted DEFA officers in post-mortems and live strandings.

Bycatch in fisheries including deep water trawls and pot fishing have been identified as important and – ship strikes and disturbance are also potential threats.
4a	What actions have been taken to prevent, reduce or control factors that are endangering or are likely to further endanger species belonging to taxa not included in section 1-5 above beyond actions to prevent disruption to migrating behaviour? Public awareness raising, training of commercial boat operators in wildlife friendly boat operation. The international basking shark conference hosted by the Isle of Man in 2009 brought together the research on this. Proceedings should be published soon. Programme and abstracts attached.
4b	Please report on the progress / success of the actions taken. Better co-ordination between basking shark researchers and conservationists has developed since the conference.
4c	Describe any factors that may limit action being taken in this regard:
4d	What assistance, if any, does your country require to overcome these factors? Opportunity for Isle of Man basking shark research results to feed more directly into UK channels so that can help in the development of policy and conservation measures at an international level.

There are Bird Sanctuaries and an Area of Special Protection for Birds, Areas of Special Scientific Interest, a National Nature Reserve and a Ramsar Site.</p>
1a	<p>Please identify the most important national sites for migratory species and their protection status:</p> <p>Langness, Sandwick & Derbyhaven ASSI – key site for migratory waterfowl.</p> <p>Central Ayres ASSI and Ayres National Nature Reserve – little tern colony and other coastal bird interest.</p> <p>Calf of Man bird observatory – Manx National Heritage land.</p> <p>Ballaugh Curraghs ASSI and Ramsar site (Ramsar confirmed 2006) – the largest hen harrier winter roost. Protected under both the Wildlife Act 1990 and the Curraghs Acquisition Act 1963.</p> <p>Ayres Pits Area of Special Protection for Birds – open water, a rare freshwater habitat on the IoM and an important new waterfowl site, under development.</p>
1b	<p>Do these protected areas cover the following areas? (If Yes, please provide details and include the amount of protected areas coverage and the number of protected areas):</p> <p>Yes No</p> <p><input checked="" type="checkbox"/> <input type="checkbox"/> Terrestrial</p> <p><input checked="" type="checkbox"/> <input type="checkbox"/> Aquatic</p> <p><input checked="" type="checkbox"/> <input type="checkbox"/> Marine</p>

3	<p>Results – please describe the positive outcomes of any actions taken</p> <p>A basking shark tagged off the Isle of Man in 2007 made the first known trans-Atlantic crossing by the species. The publication of the paper on this (Gore et al 2008) and international media attention helped to promote international links on basking shark conservation and led to the Isle of Man hosting the basking shark conference in 2009.</p> <p>Recent analysis of tag data can be found at:</p> <p>http://www.asso-apecs.org/Resultats-et-rapport-final-Fevrier.html</p> <p>For more information contact Jackie Hall at Inter.Tech@btinternet.com</p>
