

Convention on the Conservation of Migratory Species of Wild Animals

FORMAT FOR NATIONAL REPORT OF PARTIES ON THE IMPLEMENTATION OF THE CONVENTION ON THE CONSERVATION OF MIGRATORY SPECIES OF WILD ANIMALS

Reporting format agreed by the Standing Committee at its 32nd Meeting (Bonn, November 2007) for mandatory use by Parties, for reports submitted to the Tenth Meeting of the Conference of the Parties (COP10) (Norway, 2011).

The questions below combine elements of Resolution 4.1 (Party Reports) adopted by the Fourth Meeting of the Conference of the Parties (Nairobi, June 1994) and Resolution 6.4 (Strategic Plan for the Convention on Migratory Species 2000-2005), adopted by the Sixth Meeting of the Conference of the Parties (Cape Town, November 1999), the COP8 Strategic Plan 2006-2011 and Resolution 8.24 adopted by the Conference of the Parties (Nairobi 2005), as well as commitments arising from other operational Resolutions and Recommendations of the Conference of the Parties.

COP Resolution 9.4 adopted at Rome called upon the Secretariats and Parties of CMS Agreements to collaborate in the implementation and harmonization of online reporting implementation. If the development of an online reporting system advances sufficiently, Parties may have the option of reporting in this manner. There are however no guarantees at this stage that this will be the case.

Parties are encouraged to respond to all questions. Parties are also requested to provide comprehensive answers, including, where appropriate, a summary of activities, information on factors limiting action and details of any assistance required.

X. Implementation of COP Resolutions and Recommendations

Please provide information about measures undertaken by your country relating to recent Resolutions and Recommendations since the last Report. For your convenience please refer to the list of COP Resolutions and Recommendations listed below.

Resolutions

Resolution 6.2 – By-catch, and Recommendation 7.2 – Implementation of Resolution 6.2 on By-catch

See resolution 8.14

Resolution 6.3 – Southern Hemisphere Albatross Conservation

Not applicable

Resolution 7.2 – Impact Assessment and Migratory Species

Denmark applies, wherever relevant, Environmental Impact assessment and Strategic Environmental Assessments, e.g. in relation to marine and terrestrial wind farms. In 2010, an EIA was undertaken in connection with a planned large test centre for landbased wind mills in Northwestern Jutland. A possible bridge connection to Germany via the Fehmarn belt in the Baltic Sea is also being assessed presently, relating to migratory species.

Resolution 7.3 – Oil Pollution and Migratory Species

Aerial surveys on oil pollution are carried out continuously, in co-ordination with neighbouring countries, in order to minimize oil-kills of birds at sea. The whole wadden sea in Denmark, Germany and the Netherlands, as well as the whole Baltic Sea, have been designated by IMO (International Maritime Organisation) as PSSA's (Particular Sensitive Sea Areas) in order to minimize the risk of oil pollution.
