X. Implementation of COP Resolutions and Recommendations

Please provide information about measures undertaken by your country relating to recent Resolutions and Recommendations since the last Report. For your convenience please refer to the list of COP Resolutions and Recommendations listed below.

Resolutions

Resolution 6.2 – By-catch, and Recommendation 7.2 – Implementation of Resolution 6.2 on By-catch

Council Regulation no 812/2004 laying down measures concerning incidental catches of cetaceans in fisheries and amending Regulation (EC) no 88/98 is in force and in the case of Finland is meant to prevent the Harbour porpoise being by-caught in the Baltic Sea. The appropriate provisions have partly been included in the domestic fishery legislation.

Resolution 6.3 – Southern Hemisphere Albatross Conservation

-

Resolution 7.2 – Impact Assessment and Migratory Species

Finland has had EIA legislation having provisions for fauna and biodiversity together with general provisions for SEA already from 1994. A specific SEA legislation came into force in June 2005. There is a specific procedure included in the Nature Conservation Act dealing with Natura 2000 sites for evaluating impacts of plans and projects which could negatively affect the natural values which are the basis for designating a particular site.

Resolution 7.3 – Oil Pollution and Migratory Species

Finland has a state governed system to respond to oil spills under the direction of Ministry of the Environment. The practical action is coordinated by Finnish Environment Institute and Regional Environment Centers with the help of local authorities. Specific measures (and instructions in the web) for taking care and cleaning birds affected by oil have developed by Finnish Environment Institute. Additionally WWF Finland as a part of their Baltic campaign has established voluntary oil spill prevention groups which have received appropriate training. Furthermore in the spring of 2008 WWF Finland together with Finnish Environment Institute and Easter-Uusimaa Provincial Rescue Center have introduced an innovative unit consisting of three transport containers for cleaning and caring oiled birds.

Resolution 7.4 – Electrocutation of Migratory Birds

Electrocutation in the context of transmission lines is not a problem in Finland because the transmission parts under voltage are insulated in such a way that birds cannot receive an electric shock.

Resolution 7.5 – Wind Turbines and Migratory Species

A national survey in the marine area in Finland for potential site for wind turbine parks has been for the most part conducted. At the present there are three concrete projects to establish wind turbine parks in the coastal area of Gulf of Finland and Bothnian Bay. These all are subject to EIA procedure. Impacts on birds are among the priorities evaluated.

Annex: Updating Data on Appendix II Species

The tables below contain the list of all species listed in Appendix II.

New Parties which have acceded since COP8 in 2005 and Parties which did not submit a National Report in 2005 are requested to complete the entire form.

Parties that did submit a report in 2005 need only which information has changed (e.g. new published distribution references and details concerning species added to Appendix II at COP8).
