

Convention on the Conservation of Migratory Species of Wild Animals

Secretariat provided by the United Nations Environment Programme

37th Meeting of the Standing Committee

Bonn, 23-24 November 2010

CMS/StC37/15
Agenda Item 12

PROPOSALS ON THE RETIREMENT OF RESOLUTIONS AND RECOMMENDATIONS TAKEN BY THE COP FROM THE FIRST TO EIGHTH MEETINGS

1. This document has been prepared by the Secretariat for the consideration by the Parties at CMS COP 10.
2. The nine CMS COPs held between 1985 and 2008 have adopted a total of 136 Resolutions and Recommendations. Most of these Resolutions and Recommendations are still in force and are being implemented, and thus remain valid in their totality. For these decisions, the COP may need to choose whether or not to maintain them or retire them.
3. Alternatively, the COP may decide to merge and consolidate those paragraphs of the various decisions that are still applicable and valid. Other decisions may or may not have been completely implemented and thus not be absolutely out of date. The Resolutions calling on Parties to establish agreements for populations of small cetaceans have in part been implemented through the negotiation and adoption of instruments (ASCOBANS, ACCOBAMS, and the MOUs on Pacific Island Cetaceans and West African Aquatic Mammals). While there are still regions and populations of small cetaceans not covered by an agreement, implementation cannot be considered to be complete and the Resolutions are therefore still in force.
4. There are, however, other Resolutions and Recommendations which have been completely implemented and have thus become redundant or obsolete. For these, the COP may wish to review them and decide to retire them. In addition, there are the Financial Resolutions adopting the biennial/triennial budget which were time bound and automatically expired, superseded by the budget adopted at the following COP. The same is true of the Resolutions containing the Strategic Plan. The successive Resolutions establishing the Standing Committee, setting out its duties and determining its composition have tended to repeal all previous provisions. The most recent Resolution (Resolution 9.15 adopted at COP9 in 2008) is totally self-contained.
5. The Secretariat has reviewed all decisions adopted at all previous COPs and provides the following results herewith:
 - (i) Annex I contains a list of Resolutions and Recommendations in a tabular form in the order they were adopted from COP 1 to COP 8 with a status of each on the basis of the above identified criteria.
 - (ii) Annex II contains a list of Resolutions and Recommendations that have been partially implemented hence not yet fully out of date for which the COP may decide whether or not to maintain them or retire them.
 - (iii) Annex III contains a list of Resolutions and Recommendations that have been fully implemented or reflected in subsequent decisions or superseded by subsequent decisions and thus COP may consider to retire them.

For reasons of economy, documents are printed in a limited number, and will not be distributed at the meeting. Delegates are kindly requested to bring their copy to the meeting and not to request additional copies.

- (iv) Annex IV contains a list of Recommendations and Resolutions that are still being implemented and thus valid for which the Secretariat does not propose any change on them unless the COP decides otherwise.
- (v) Annex V contains a list of all Resolutions grouped thematically

Recommendations to COP

- 6. The Secretariat requests the COP to take appropriate action in relation to Annex (ii) and (iii) above
- 7. The Secretariat requests the COP to consider when drafting, reviewing or debating future Resolutions and Recommendations to:

Action requested:

- a) Re-examine existing decisions on the same or similar topics with a view to retaining them and subsequently consolidating them with other relevant decisions which are still valid or have continuing effect, or retiring the old resolutions or recommendations which have been fully implemented or have no continuing effect or have been superseded by subsequent decisions;
- b) Incorporate an expiry mechanism and/or criteria within the Resolutions or Recommendations, where appropriate, so that the Resolutions or Recommendations automatically ceases to be effective after a stated period lapsed or objective has been achieved.
- c) Alternatively, agree on the interval period between the adoption of a decision to its review for possible retirement.
